TANUJ GAUR

Backend Developer | Node.js | Fintech Systems
Delhi NCR | +91-9756578280 | tanujgaur288@gmail.com
LinkedIn: https://www.linkedin.com/in/tanuj-gaur-01b842211/

PROFESSIONAL SUMMARY

Backend Developer with **3+ years of experience** building scalable fintech systems using **Node.js and microservices architecture**. Proven track record of contributing to systems enabling **₹350+ Crore loan disbursement**. Expertise in **API design, secure authentication (JWT, HMAC), and high-performance backend systems**. Strong experience in **KYC, AML, Account Aggregator, and payment integrations**, with a focus on performance optimization and scalability.

TECHNICAL SKILLS

Backend & Languages: Node.js (Express.js), JavaScript, TypeScript, Java, Spring Boot
Databases & ORM: MongoDB, MySQL, Mongoose, Sequelize, Hibernate, JPA
Architecture & Tools: Microservices, REST APIs, Redis (Caching), Docker
Security & Auth: JWT, Session Auth, HMAC Authentication
Fintech Integrations: KYC, CKYC, AML, Account Aggregator, DigiLocker, Digio, Digitap, Signzy, Easebuzz, Gridlines
Payment Gateways: PayU, PhonePe

PROFESSIONAL EXPERIENCE

Software Engineer – i2iFunding Pvt. Ltd., Noida

Mar 2023 – Present

- Built and scaled backend systems using **Node.js**, supporting **₹350+ Crore loan disbursement workflows**
- Automated onboarding journey (E-KYC & CKYC), reducing **manual verification effort by ~60%** and improving onboarding speed
- Developed and maintained **REST APIs handling thousands of daily requests** for onboarding, loan processing, and document workflows
- Integrated **Account Aggregator & AML systems**, enabling **real-time income analysis and fraud detection**
- Implemented **Video KYC (Digitap) & Selfie Liveness (Signzy)** ensuring compliance with regulatory standards
- Integrated Aadhaar (DigiLocker), PAN verification, and bank validation APIs, improving **data accuracy and verification speed**
- Integrated **PayU & PhonePe payment gateways**, ensuring **secure and seamless transaction processing**

- Improved system performance by **30–40% using Redis caching** and optimized database queries
- Containerized services using Docker, improving **deployment consistency and scalability**
- Implemented **HMAC authentication**, securing APIs against tampering and replay attacks

---

System Design & Architecture Contribution

- Designed and implemented a **dynamic loan routing system**:
  - User journey: EasyPay → Onboarding Portal → Decision Engine → Vendor Routing
  - Built rule-based engine using **loan amount, product type, and eligibility criteria**
  - Enabled **multi-vendor integration with dynamic switching**, improving scalability and flexibility
- Ensured **high availability and fault tolerance** in loan processing systems

---

KEY PROJECTS

Finz Finance (Loan Lifecycle System)

- Developed an **end-to-end loan lifecycle platform** covering onboarding, verification, decisioning, and disbursal
- Built a **rule-based decision engine**, improving loan routing accuracy and reducing manual intervention
- Designed APIs for:
  - Loan creation & tracking
  - Document upload & validation
  - Disbursal workflows with correct bank mapping
- Ensured **data validation and consistency**, preventing incorrect disbursal scenarios
- Improved system reliability and reduced processing errors

---

i2iFunding Platform

https://www.i2ifunding.com/

- Automated investor onboarding using **E-KYC, CKYC, AML, and Account Aggregator**
- Reduced onboarding turnaround time and improved user experience
- Built scalable APIs supporting **high concurrent traffic**

Finclud Mauritius

https://finclub.mu/public/home

- Developed onboarding systems for **partners, borrowers, and investors**
- Built REST APIs supporting **cross-border fintech workflows**
- Designed modular backend services for **easy scalability and integration**

INTERNSHIP

Frontend Developer Intern – eRentals

Apr 2022 – Jun 2022

- Worked on UI improvements and frontend features
- Collaborated with backend team for API integration and debugging

---

EDUCATION

MCA – Bundelkhand University
2022

KEY ACHIEVEMENTS

- Contributed to backend systems enabling **₹350+ Crore loan disbursement**
- Reduced onboarding effort by **~60% through automation**
- Improved API performance by **30–40% using caching strategies**
- Built scalable **multi-vendor loan routing architecture**

ADDITIONAL INFORMATION

- Strong problem-solving and debugging skills
- Hands-on experience in real-world fintech systems
- Quick learner with ability to adapt to new technologies
